EDITION 1 · OCTOBER 2026

Meter Readings

User Guide

Record daily ticket sales · Reconcile cash · Review performance · Export reports

For businesses and their staff

EN · AR

What the app does

Meter Readings is a simple web app for recording the tickets you sell each day. You enter the start and end ticket numbers for each game; the app calculates tickets sold and revenue, checks your cash against the sales, and keeps a secure history you can review and export at any time. It works in any browser on a phone, tablet or computer, with nothing to install.

01
Record
Enter each game's Begin and End numbers. Totals are calculated instantly.

02
Reconcile
Compare counted cash with expected cash and see any over / short at once.

03
Review
See performance over any period with clear charts and daily lists.

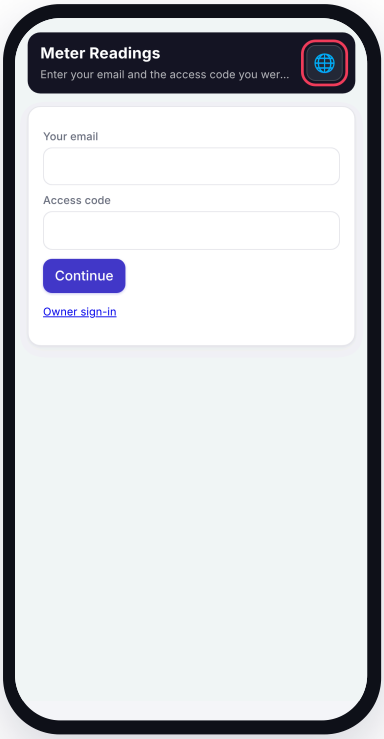

04
Export
Download your data as Excel, PDF or CSV for reporting.

Section 1	Getting started
Section 2	The Home page: daily entry
Section 3	Daily cash check
Section 4	Records: reviewing performance
Section 5	Export
Section 6	Logging out and good practice

SECTION 1

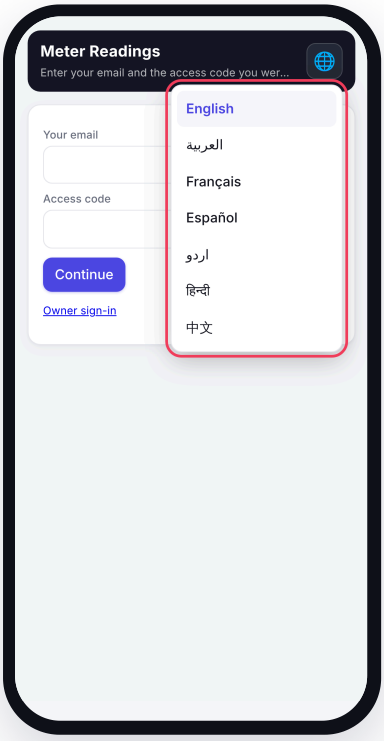

Getting started

Step 1

Open the app

Open the link you received from the owner in any browser. The sign-in page appears. Bookmark it or add it to your home screen for quick access.

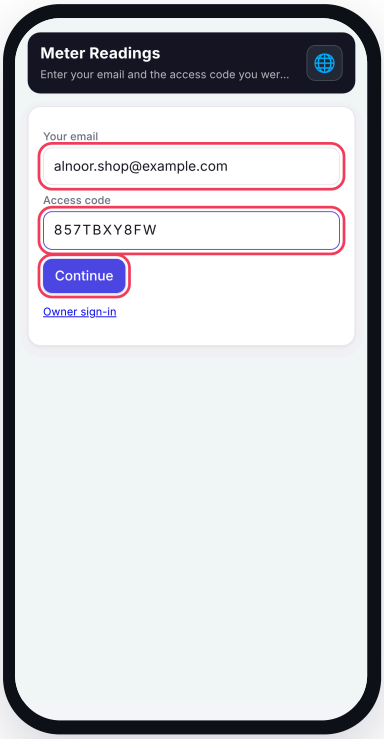

Step 2

Choose your language

Before signing in, tap the globe button (top corner) and choose your language: English, العربية, Français, Español, اردو, हिन्दी or 中文. The whole app switches immediately. You can change it later from the menu.

SECTION 1

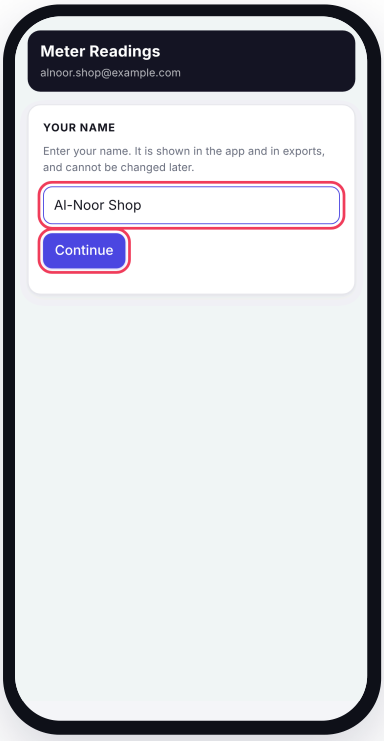

Getting started

Step 3

Sign in

Enter your email and the access code from the owner, then tap Continue. You stay signed in, even after closing the browser, until you choose Log out.

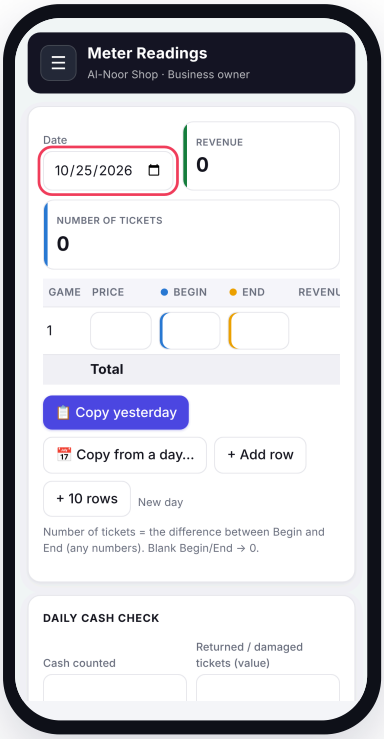

Step 4

Enter your name (first time only)

Type your name or shop name and tap Continue. It appears in the app and in every export, and cannot be changed later, so check the spelling.

SECTION 2

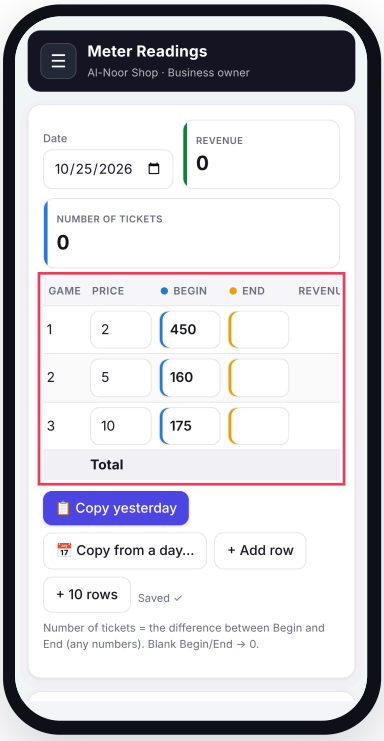

The Home page: daily entry

Step 5

Your daily page

The Home page always opens on today. At the top you see the Date, today's Revenue and the Number of tickets sold; both update as you type.

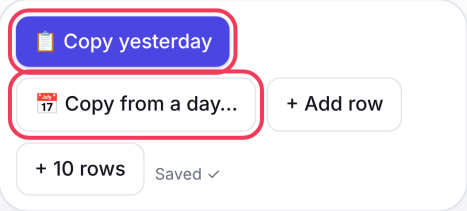

Step 6

Start the day: Copy yesterday

Tap Copy yesterday to bring in yesterday's games. Each price is kept and yesterday's End number becomes today's Begin, so you only fill in today's End.

SECTION 2

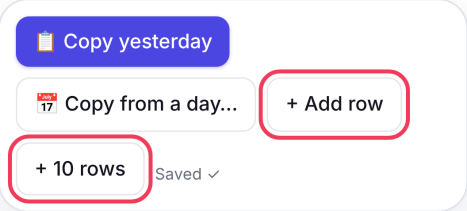

The Home page: daily entry

Step 7

Copy from a specific day

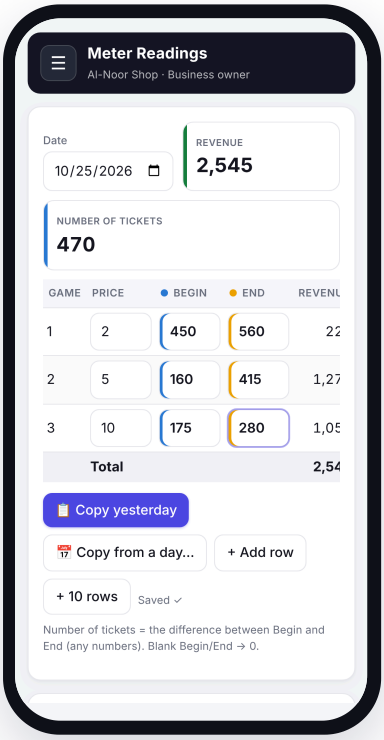

Tap Copy from a day... and pick any earlier date to use that day as the starting point. Choosing another day later replaces only the copied rows; rows you added yourself are kept.

Step 8

Add rows

Tap + Add row for one new game, or + 10 rows to add ten at once. Remove an unwanted row with ✕.

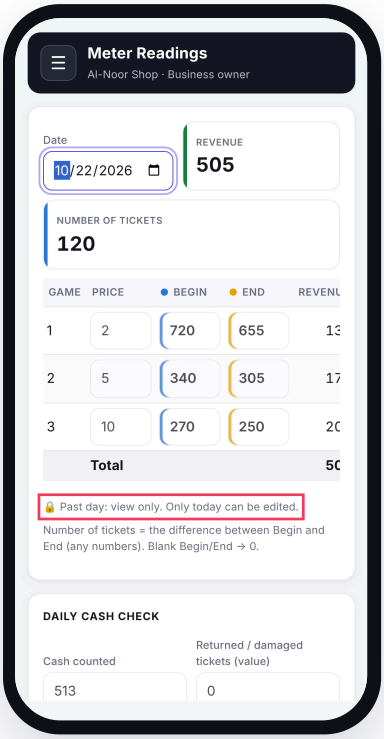

Step 9

Enter the readings

For each game fill in Price, Begin (blue marker) and End (amber marker). Number of tickets = the difference between Begin and End; Revenue = tickets × price. Everything saves automatically: look for “Saved ✓”.

SECTION 3

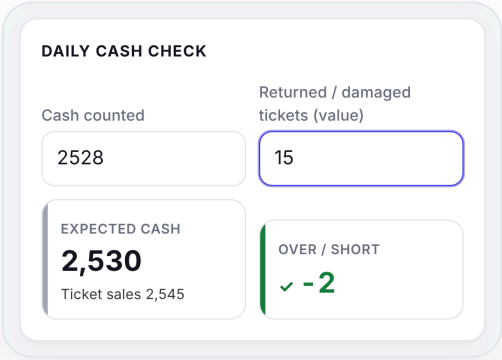

Daily cash check

Step 10

Past days are locked

Pick an earlier date to view what was recorded. Past days are view only: they cannot be edited, which keeps your history reliable for audits.

Step 11

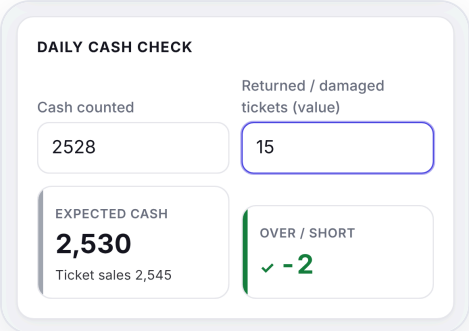

Reconcile the cash

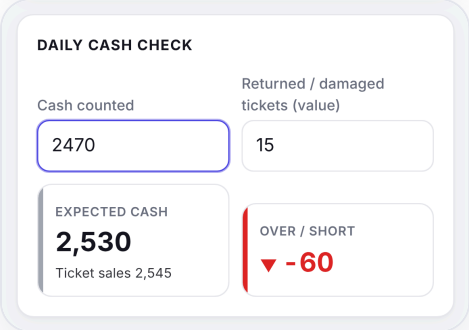

At the end of the day enter Cash counted and the value of Returned / damaged tickets. The app shows Expected cash (ticket sales − returned) and the difference.

> Expected cash = Ticket sales − Returned / damaged tickets. Over / short = Cash counted − Expected cash.

SECTION 3

Daily cash check

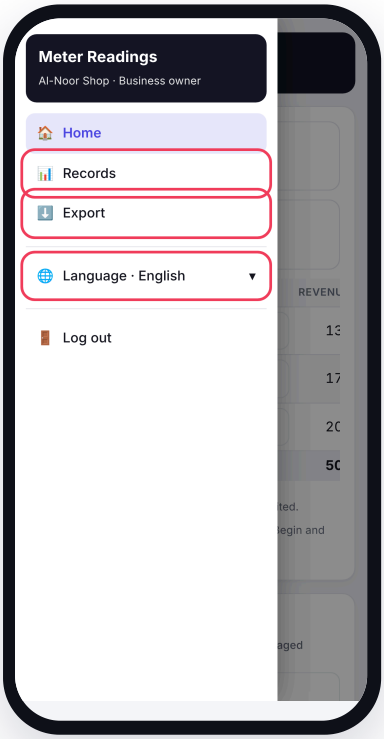

Step 12

Read the Over / short result

✓ Green: the cash matches within the allowed margin. ▼ Red: cash is short. ▲ Blue: cash is over. Check a red result before closing the day.

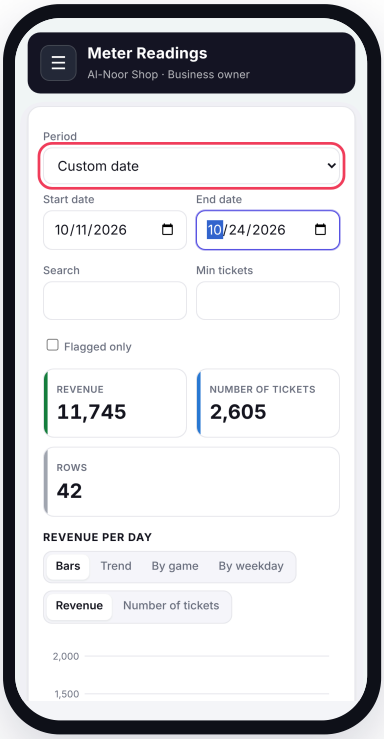

Step 13

Open the menu

Tap ☰ to move between Home, Records and Export, change the language, or log out.

SECTION 4 Records: reviewing performance

Step 14

Choose a period

In Records choose a Period: Today, Yesterday, This week, Last week, Last month or Custom date. The tiles show total Revenue, Number of tickets and rows, compared with the previous period.

DATE	GAME	PRICE	BEGIN	END	REVENUI
2026-10-11	1	2	900	820	160
2026-10-11	2	5	600	550	250
2026-10-11	3	10	400	360	400
2026-10-12	1	2	820	730	180
2026-10-12	2	5	550	480	350
2026-10-12	3	10	360	325	350
2026-10-13	1	2	730	660	140
2026-10-13	2	5	480	440	200
2026-10-13	3	10	325	295	300
2026-10-14	1	2	660	550	220
2026-10-14	2	5	440	360	400
2026-10-14	3	10	295	250	450
2026-10-15	1	2	550	455	190

Step 15

Daily list and reconciliation

Below the chart you find every recorded row, and the Daily reconciliation table showing sales, returns, expected cash, cash counted and over / short for each day.

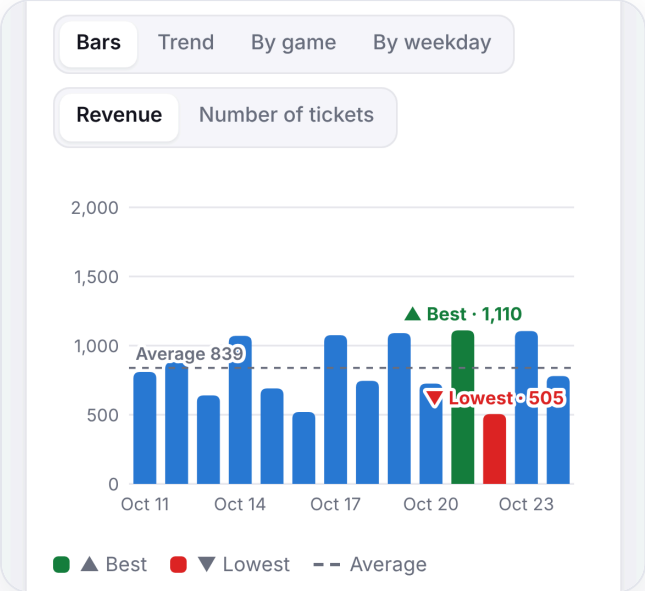

SECTION 4

Records: reviewing performance

Step 16

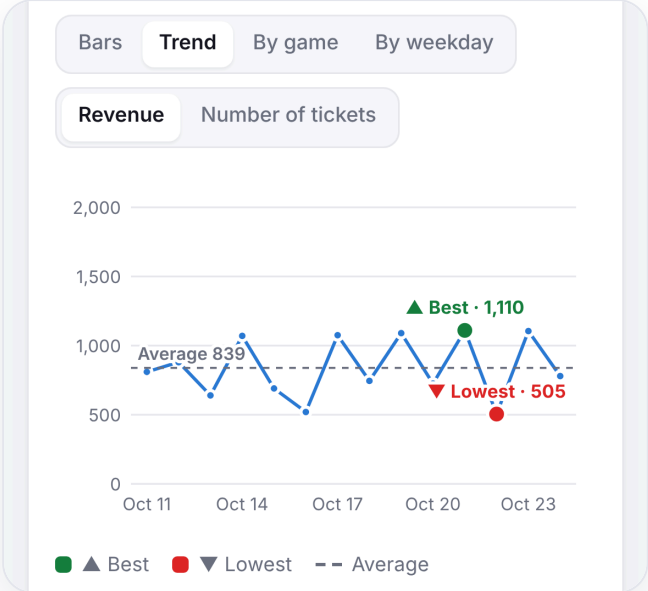

Read the chart

Switch between four views and between Revenue and Number of tickets. Tap any bar or point to see its exact figures.

Bars

Daily totals. The best day is green, the lowest red; the dashed line is the average.

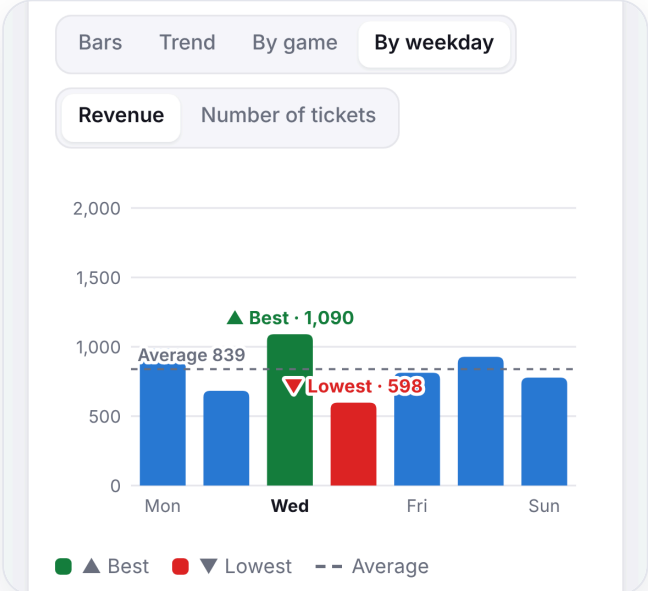

Trend

The direction over time: rising, falling or steady.

By game

Each game's share of every day, to see which games earn the most.

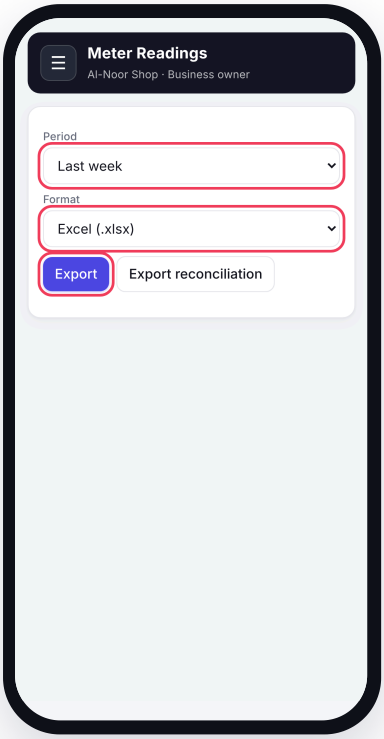

By weekday

Average per weekday, to plan staff and stock.

SECTION 5

Export

Step 17

Export your data

Open Export, choose the Period and the Format (Excel, PDF or CSV) and tap Export. Export reconciliation downloads the daily cash table instead.

Step 18

What the file looks like

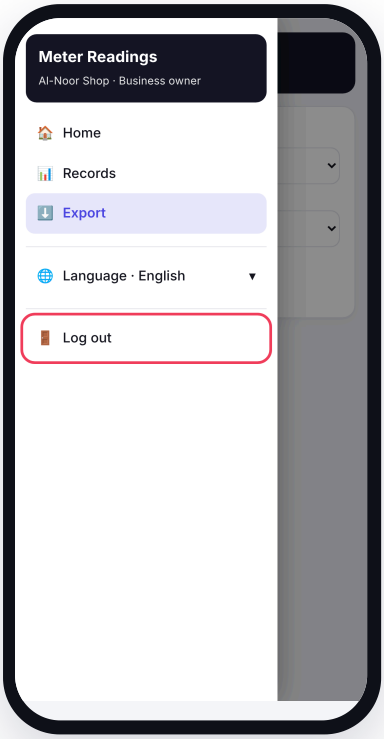

The Excel file has one row per game per day with Date, Game, Price, Begin, End, Revenue and Number of tickets, ready for totals, filters and pivot tables.

readings_week.xlsx — Excel

	A	B	C	D	E	F	G
1	**Date**	**Game**	**Price**	**Begin**	**End**	**Revenue**	**Number of tickets**
2	2026-10-12	1	2	820	730	180	90
3	2026-10-12	2	5	550	480	350	70
4	2026-10-12	3	10	360	325	350	35
5	2026-10-13	1	2	730	660	140	70
6	2026-10-13	2	5	480	440	200	40
7	2026-10-13	3	10	325	295	300	30
8	2026-10-14	1	2	660	550	220	110
9	2026-10-14	2	5	440	360	400	80
10	2026-10-14	3	10	295	250	450	45
11	2026-10-15	1	2	550	455	190	95
12	2026-10-15	2	5	360	300	300	60

SECTION 6

Logging out and good practice

Step 19

Log out

Tap ☰ → Log out when you finish on a shared device or before switching to another phone or computer.

Good practice

- Enter readings during the day: each change saves automatically.
- Your access code works on one device at a time. Log out before switching. Lost your phone? Ask the owner to reset the device.
- Logging out never deletes data: everything is stored securely online.
- Past days cannot be changed. Check the numbers before the day ends.

Need help? Contact the owner who gave you access.
